B-12 - Methylcobalamin 2500 mcg (\$22) or Double 5000 mcg (\$40) - Me-B12 is the form of B-12 that is recognized by the human body. 99% of active B-12 in the body is Me-B12. This means that it has a faster & stronger effect on the body than classic Cyanocobalamin. It is immediately absorbed by the nervous system and brain. It is preferred for Bell’s Palsy, Dementia, Cancer, Sleep Disturbances, Decreasing Homocysteine levels and for Enhancing Immunity. It is used by physicians worldwide who understand its ability to decrease stress in the body making it the #1 choice when it comes to B-12.

Super B12 - for Energy (\$35) - The power of Me-B12 & combined with carnitine which works in energy production at the cellular level plus lipotropic factors to promote liver metabolism all adds up to energy production and efficiency.

B-Complex w/Folic acid - (B-1, B-2, B-3, B-5, B-6, FA) - ALONE (\$37) or COMPANION SHOT* (\$13) - The B vitamins & FA are known as the “catalytic plugs” of the body. They catalyze many chemical reactions because of their important roles as coenzymes, provide energy by converting carbohydrates into glucose, are vital in the metabolism of fats & protein, are necessary for normal functioning of the nervous system, & are essential for maintenance of muscle tone in the gastrointestinal tract & for the health of skin, hair, eyes, mouth & liver. **FOLIC ACID** is necessary for the synthesis of nucleic acids and the formation of red blood cells. Folic-acid deficiency most commonly causes folic-acid-deficiency anemia. Symptoms include gastrointestinal problems, such as sore tongue, cracks at the corners of the mouth, diarrhea, and ulceration of the stomach and intestines. It also helps decrease homocysteine levels which has been associated with dementia and heart ds.

Coenzyme Q10 (CoQ10) (\$29) - Coenzyme Q10 (CoQ10) is a fat-soluble compound primarily synthesized by the body and consumed in the diet. Coenzyme Q10 is required for mitochondrial ATP synthesis (ENERGY) and functions as an ANTIOXIDANT in cell membranes and lipoproteins. Tissue levels of coenzyme Q10 decline with age. Coenzyme Q10 supplementation has resulted in clinical and metabolic improvement in patients with CONGESTIVE HEART FAILURE. There is a role for coenzyme Q10 supplementation in CARDIOVASCULAR DISEASE, NEURODEGENERATIVE DISEASE, CANCER, and DIABETES. The use of cholesterol-lowering medications known as STATINS decreases circulating levels of coenzyme Q10.

Glutathione 100 mg - ALONE (\$25) or COMPANION SHOT* (\$15) - Glutathione (GSH) is a tripeptide consisting of the amino acids glutamine, cysteine & glycine. It is involved in detoxification. It binds to toxins including solvents, pesticides & heavy metals and transforms them into a substance that can be easily excreted from the body. It is a powerful antioxidant. It is considered to be the most powerful anti-carcinogen that the body makes. Individuals with HIV/AIDS, hepatic cirrhosis, respiratory distress & cataracts have all been shown to have a deficiency in GSH. Smokers are at risk for deficiency of GSH. Studies show people with higher levels of GSH have better health.

Vitamin D3 - Cholecalciferol 50,000 IU (\$49) - Vitamin D is produced by your skin in response to exposure to UV radiation from natural sunlight. It is nearly impossible to get all of the vitamin D that your body needs from your diet. Intravenous or intramuscular injections of vitamin D are the only reliable way to generate adequate amounts of vitamin D in the body. Vitamin D is implicated in the prevention and the reversal of many types of cancers. Simply supplementing with 2000 iu of vitamin D3 daily will strengthen your immune system and may cut your cancer risk in half.

LipoInject for Fat Loss (\$39) - L-Carnitine, Me-B-12, Methionine, Choline, & Inositol Lipotropic is a fancy word for three amino acids that are essential for the health of your liver. The liver is responsible for removing fat & toxins from your body. When using LipoInject* you decrease the deposit and speed the removal of fat within the liver. Studies show that once weekly injections of the LipoInject* formula along with proper diet can assist in weight reduction and over all body fat loss and increased energy.

*** COMPANION SHOT must be taken with another fully priced shot.**
